Free trade can be defined as

- Trade in which poor countries get free goods and services.
- Trade in which countries exchange free goods and services.

- Trade among free countries.
- Trade between nations with limited tariffs or other barriers.

Incorrect

Question 2

0 / 5 pts

The theory of comparative advantage says try to have an advantage in everything before you trade.

- (selected) True
- False

Unanswered

Question 3

Not yet graded / 5 pts

What is a budget deficit and what are its impacts on politics and the economy?

Your Answer:

ANSWER = A budget deficit occurs when a government spends more money than it gathers in revenue. Budget deficits are typically funded by borrowing, by selling bonds to investors, who are paid back over time from future tax revenues. Budget deficits can cause inflation if the borrowing occurs when an economy is already booming. Critics also argue that budget deficits can crowd out private borrowing and reduce economic growth, although there is little evidence for this. Financing deficits generally reduces the amount of money available for other projects, and may keep tax rates higher than they might be otherwise.

Incorrect

Question 4

0 / 5 pts

States generally fund budget deficits by which method?

- Selling bonds to investors.
- Raising taxes.
- Borrowing from foreign states.
- Printing more money.
- none of these answers is correct

- True
- False

Incorrect

Question 10

0 / 5 pts

Budget deficits crowd out private borrowing and cause economies to shrink.

- (selected) True
- False

Question 11

5 / 5 pts

Arguments for international trade include all of the following except:

- Every country has to buy something it does not produce from other countries.
- Every country will be better off by producing what they are good at.
- (selected) International trade costs nothing for each country.
- International trade promotes peace among nations.
- No country in the world can produce everything it needs.

Incorrect

Question 12

0 / 5 pts

Arguments against free trade include all of the following except:

- Imported goods can be of low quality and high price.
- It promotes poor working conditions.
- Trade costs some people their jobs.
- It contributes to environmental problems.
- It promotes low wages.

Incorrect

Question 13

0 / 5 pts

States fund budget deficits mostly by printing more money.

- True
- False

Incorrect

Question 14

0 / 5 pts

Scientists argue that climate change exists for the following reasons except:

- Extreme weathers are becoming more frequent in the world.
- The amount of carbon in the atmosphere has increased faster since the 1800s.

- The average temperature is decreasing during the winter in the United States.
- The sea level is around the world.
- The average temperature in the world is rising in recent years.

Incorrect

Question 15

0 / 5 pts

The biggest cause of the 2007 financial meltdown was:

- Excessive bank loans.
- Loose monetary policy.
- Excessive federal spending.
- Side bets on derivative investments in the mortgage market.
- Consumers taking on home loans they couldn't afford.

Unanswered

Question 16

Not yet graded / 5 pts

What political challenges are presented by climate change?

Your Answer:

ANSWER = Inasmuch as climate change is a global problem, it will require global solutions, which can be difficult to achieve in the anarchic world system. The costs of changing from carbon-generating energy sources such as coal and oil can be substantially, requiring the political will of states to raise the funds to make that possible, without completely impoverishing the people who work in those industries at present. Funding also will be required to address water shortages and inefficiencies and to provide for more effective global treatment of wastewater. Interest groups on all sides of this issue may view this as a competitive, win-lose scenario, further complicating the political decision-making required to address such topics. Problems such as climate change may be difficult to solve through the normal operation of markets, since it can be difficult to put a price on things such as clean air and moderate temperatures.

Incorrect

Question 17

0 / 5 pts

Most trade occurs between rich nations, trading similar products.

- True
- False

Question 18

5 / 5 pts

The theory of comparative advantaged can be defined as:

A theory based on the idea that countries would be better off if they buy what they are not good at.

all of these answers are correct

none of these answers is correct

A theory that justifies free trade.

A theory based on the idea that countries would be better off if they produce what they are good at.

Question 19

5 / 5 pts

Tariffs are a tax on imports.

True

False

Question 20

5 / 5 pts

Arguments over free trade pit people whose livelihoods depend on trade against those whose livelihoods are threatened by it.

True

False
